

HOW TO USE YOUR CHECKLIST

The list is arranged in the order established by the American Ornithological Union (1983). Symbols that appear in this checklist represent the following:

SEASONAL APPEARANCE

Sp Spring (March-May) **S** Summer (June-August)
F Fall (Sept.-Nov.) **W** Winter (Dec. – Feb.)

SEASONAL ABUNDANCE

A Abundant – should see on 75% or more of trips in proper habitat and season.
C Common – should see on 25% to 75% of trips.
U Uncommon – should see on 10% to 25% of trips.
R Rare – not seen annually but may occur again.
X Accidental – seen only once or twice.
H Historical – no longer occurs at Haehnle.
***** Has nested at Haehnle
****** No longer nesting at Haehnle
 The checklist includes 214 species of birds.

WHERE TO LOOK

The Harold Wing Observation Site provides a panoramic view of Mud Lake Marsh for wetland birds. Entrance into the Mud Lake Marsh is by written permit only. Birding along mowed trails is good for seeing grassland, shrub and woodland birds as you pass through these habitats. In spring, the trees along the west side of the grassland and woods north of Eagle Lake are good for neotropical migrants. Large flocks of waterfowl can be seen in the spring south of the Portage River Drain. Park near the Wooster Rd. bridge and walking east along the dike. Do not proceed beyond the private land signs.
